PLASTO-SPOT

Robust and portable, Quick install, Easy clean, Design flexibility
Swiss Engineering, Design and Manufactured

This is how PLASTO-SPOT is intalled:

1. Measure the complete surface to be covered
2. Calculate the overall surface into section of 33,3 x 33,3 cm.
3. Count the number of panels at the outer edge of the surface = quantity of Edge profiles required
4. Do not forget the corner pieces!
